SUMMARY

As a Senior Front-End Developer with over 10 years of experience, my objective is to leverage my skills and expertise in developing innovative and user-friendly web applications, while staying up-to-date with emerging technologies and industry trends. I am seeking a challenging role in a dynamic organization that values creativity, teamwork, and continuous learning, where I can contribute my technical proficiency and leadership abilities to deliver outstanding results. My ultimate goal is to drive the company's growth and success by delivering exceptional Front-End solutions that meet and exceed customer expectations.

SKILLS

HTML, CSS3, JavaScript, React, Redux, Redux Toolkit, Node.js, Express.js, MySQL, PostgreSQL, MongoDB, Redis, Docker, Git, RESTful APIs, GraphQL, React Query

EXPERIENCES

SENIOR FRONT-END DEVELOPER

02-2024 - Present

Wall-it - Slovakia (Remote)

- As a Front-End Developer at Wall-it, I worked on a Ting website built with Next.js 14 and TypeScript, utilizing the React Query and Zustand for state management. It was a decentralized video sharing platform on blockchain technology. My responsibilities included implementing new features, optimizing website performance, create video player based on P2P connection and ensuring a seamless user experience.

SENIOR FRONT-END DEVELOPER AND TEAM LEAD

05-2018 - 02-2024

Sabaidea - Tehran, Iran

- Team Lead at Aparat** (Jun 2023 – Feb 2024): As the Front-End Team Lead at Aparat, I have led a team of talented developers in building and enhancing the front-end architecture of one of the largest and most popular video-sharing platforms in Iran.
- Filimo** (2020 – Jun 2023): As a Front-End Developer at Filimo, I worked on a website built with React and TypeScript, utilizing the Redux Toolkit for state management. My responsibilities included implementing new features, optimizing website performance, and ensuring a seamless user experience.
- Aparat** (2019 – 2020): As a Front-End Developer at Aparat, I was part of a team that transferred the website from PHP to React, utilizing TypeScript and Redux Saga for state management. My role involved collaborating with designers and back-end developers to implement new features, optimize website performance, and enhance the user experience.
- Sabavision** (2018 – 2019): As a Front-End Developer at Sabavision, I played a key role in designing and implementing a panel for the website, utilizing React, Redux, and Ant Design. My responsibilities included collaborating with designers and back - end developers, ensuring cross-browser compatibility, and implementing responsive design.

FULL STACK DEVELOPER

01-2016 - 05-2018

Shery co - USA (Remote)

- As a Full Stack Web Developer at Shery, I was responsible for building an API using Node.js, and integrating MongoDB and Redis databases. On the front-end, I utilized React and Redux for efficient state management. My duties included collaborating with the team to design and implement new features, ensuring scalability and security of the system, and maintaining high code quality.

SENIOR FRONT-END DEVELOPER

01-2014 - 01-2016

Velum Media Startup - USA (Remote)

- As a Front-End Developer at Velum Media, I was part of a team responsible for creating animated websites for client companies. Our main technologies included JavaScript, jQuery, React, and Angular. My role involved collaborating with designers to bring their visions to life, implementing animations and user interactions, and ensuring website performance and compatibility across devices.

MID FRONT-END DEVELOPER

01-2012 - 01-2014

Hero Startup - Tehran, Iran

- As a Front-End Developer at Hero Startup, I worked on a sports board website built with AngularJS. My responsibilities included implementing new features, optimizing website performance, and ensuring a seamless user experience. I collaborated with designers and back-end developers to create an engaging and dynamic platform for users to interact with sports-related content.

NETWORK ASSISTANT

01-2011 - 01-2012

Behdis - Tehran, Iran

- As a Network Assistant and System Administrator at Behdis, I was responsible for managing and maintaining the company's network and computer systems. My duties included troubleshooting network and system issues, installing and configuring software and hardware, ensuring data security and backups, and providing technical support to employees. I worked closely with the IT team to maintain optimal system performance and minimize downtime.
